

Privacy and Account Verification

Verifying your identity

Before we share any information about your loan, we must confirm who you are. You will be asked for:

1. The mobile number registered on your loan, and
2. The last four digits of your Omang or passport number

We will not share any account information until both match our records. After **three failed attempts**, the conversation is transferred to a customer service agent.

Who we share your information with

We only discuss your loan with you. We do not share your loan information with anyone else — including your spouse, relatives, friends or employer — even if they say they have your permission. Anyone who wishes to act on your behalf must visit a branch with you and complete a signed authority form.

General information

Information about our products, policies, branches and how to pay is not personal and can be shared with anyone.

Keeping your account safe

Kopano will never ask for your PIN, password or one-time code. If anyone asks for these claiming to be from Kopano, do not share them and report it to us.
